INSTALLATION WALKTHROUGH:

1. Remove (4) torx head fasteners which attach bottom rear portion of bumper cover to vehicle.

2. Remove mud flap from behind each rear tire by unfastening (5) torx head screws from each. **Note:** Underside fasteners have a nut attached.

INSTALLATION WALKTHROUGH:

3. Remove fastener which holds wheel well trim to fascia. Carefully pop off wheel well trim. **Note:** Only the rear half of the trim needs to be removed.

4. Remove (4) torx head fasteners from under wheel well trim.

- 5a. On VW Touareg remove the vehicle tail lights by loosening nut from inside vehicle using a 11mm socket. Driver side nut is accessible through circular plastic clip and the passenger side through rectangular clip. Carefully slide the light out and unfasten the electrical clip. See step 5b for Porsche Cayenne tail light removal

- 5b. On Porsche Cayenne remove the vehicle tail lights by taking of the panel shown on the photo. Then remove the panel cover to reveal the nuts on the inside of the tail light. Remove the nuts and carefully slide out the light and unfasten the electrical clip.

INSTALLATION WALKTHROUGH:

6. Remove (2) torx head fasteners and (1) push fastener from each side. These are now accessible due to tail light removal. **Note:** Use a small punch or equivalent to push the center of push fastener down then pry up.

7. Carefully remove bumper cover. Pop sides off first, then pull straight back.

8. Remove foam insert. Remove bumper beam by unfastening (8) M12 bolts. These bolts will be used to install the hitch. Return bumper beam to vehicle owner.

9. Install the hitch using the M12 bolts removed in step 8. Foam insert can be discarded or trimmed and reinstalled. **Note:** Trim foam so it loosely fits into position.

INSTALLATION WALKTHROUGH:

10. Torque all 12M fasteners to 82 ft-lbs and reinstall all components removed in steps 1-7
